

# Lasting efficiency, total reliability

## Global Service for Air Separation Units

The Global Service maintenance activities and specific services protect Air Separation Units (ASUs) against deterioration, handle the most frequent emergencies, and address any new industrial requirements with the correct adjustments.

Thanks to a selected stock of spare parts and highly qualified personnel, the Global Service Division provides all the necessary support to

**ensure reliable and efficient operation of the plants over time, avoid downtimes** and, if they occur, **minimizing re-instatement times.**

SIAD Macchine Impianti's Global Service Division offers the most comprehensive range of maintenance services and assistance for ASUs.

*Specialized technicians always available at your plant*

## Choose SIAD Macchine Impianti's Global Service Division for:

- **Supply of genuine spare parts: a full range of critical spare parts** always available for the most frequent emergencies. The Global Service Division also has an updated **database** that promptly notifies customers **of parts of the plant to be replaced.**
- **Preventive and predictive maintenance:** through the detection of one or more parameters (measurement of vibration, oil analysis, etc.), it is possible to establish the actual operating condition of the plant and rotating machines, **optimizing time and resources devoted to maintenance.**
- **Onsite assistance:** commissioning and correct startup of the machine in the initial phase and, subsequently, assistance for shutdown, restart and adjustment of the plant, both onsite and remotely.

*Remote assistance: a vital service to improve performance*

- **Remote assistance**
  - **at fixed times:** with monthly reports on the plant operating status and any fine tuning required.
  - **on call:** via the 24/7 telephone assistance service which also manages emergencies promptly.

## Perfectly efficient plants, always at the forefront

The link with the parent company allows SIAD Macchine Impianti to **fully understand the needs of users**.

In fact, right from the design phase, SIAD Macchine Impianti's ASUs adopt all the necessary measures to **prevent any problems relating to gases and their treatment** within the plant.

**Global Service** gives the highest priority to research, development and constant improvement in terms of efficiency, always ensuring the most advanced technology.

SIAD Macchine Impianti training courses

### Global Service offers:

#### Training of personnel

SIAD Macchine Impianti personnel are always on hand with their expertise and decades of experience through specific **training courses** to give customers the technical know-how needed to **optimize plant use in maximum safety**.

#### Engineering Services

feasibility studies to meet customers' needs:

- **energy efficiency studies;**
- **upgrading;**
- **installation of innovative control systems;**
- **plant revamping.**

Totally efficient plants, always at the forefront
